

Come visit us at the tent 2, booth 210 in RETTmobil International
11-13th of May in Fulda, Germany.

PROFILE // [®]

Profile Vehicles Oy is a designer and manufacturer of ambulances and special vehicles. It is the market leader in Nordic and Central European countries and is known for high quality products. These are developed and continuously improved in close cooperation with the end customers. With Profile ambulances, you will always get the forerunner of the industry and finest insights for emergency care, that improves safety, ergonomics, and hygiene.

SAFETY

ERGONOMICS

HYGIENE

eADVANZ

Zero Emission

The first electrical ambulance model from Profile is built on the Mercedes Benz Tourer chassis. It has built with the same high security, ergonomic and hygiene standards as our regular models, while focusing on making this the most environmentally friendly ambulance in the market. The interior is built by using recycled & sustainable materials and with the electrical motor the emissions are at zero. eAdvanz makes a perfect ambulance for cities and for patient transfers, while taking care of the environment.

Type A

eADVANZ
THINK LIFE - THINK GREEN

LEONARDO

Ambulance with standard built on Stellantis (Citroën, Fiat, Opel, Peugeot) chassis. Leonardo's design is standardized to fit the general needs of ambulance care in European markets. It offers the same high-level of safety, ergonomic and hygiene standards than all Profile models, but adapted for more basic needs and/or patient transport market.

Type B

PROGREZ

One of the most popular models in Scandinavia and Middle Europe, Profile Progrez is built on Volkswagen's Crafter chassis and was designed to meet the toughest demands of today's emergency care professionals.

Type B/C

- » **ISO 9001** certified
- » Designed and manufactured in accordance with **EN 1789** regulations
- » **Green Lean** Continuous Improvement Certificate
